CLOUD COMMUNICATIONS

WHY???

- Arduino boards and ethernet shields should never taste rust. - Klingon proverb

- An excuse to learn the Twilio API and Ruby *off* Rails.

- Attention whoredom (follow me on Twitter: @huertanix).

- If we don't do it, the terrorists will.

- For. The. Lulz.

"Isn't there some kind of hacker rule that says you can't make something that can only be used for evil?"
- Futurist Mike

"I think that's just for robots."
- David Huerta

Canto I: twilio-ruby

- Code in Ruby? Use the Ruby Twilio Helper Library.

    - Ruby Gems: gem install twiliolib.

    - GitHub: https://github.com/twilio/twilio-ruby

- MIT licensed. Stick it in whatever you want it.

Code!

Canto II: Arduino

- Ingredients

- Arduino board (Duemilanove)

- Arduino ethernet shield

- Sparkfun 16x2 serial LCD display

- Sparkfun 12 button keypad

Canto III: Trimmings

- Ikea RARITET food containers make useful, cheap, durable, and sexy project enclosures

- Openings required for keypad, RJ45 (8-pin) jack and keypad

- Rectangular openings with sharp right angles
